

Our Wishes for the UN Decade of Sustainable Energy for All **How to accomplish**

The Clean Sustainable Family of organisations wish you all a

Successful Happy New Year

**on a naturally green planet Earth
in pure air and with clean water
clean sustainable energy for all
peacefully in an armless society** 

Clean Energy dedicated to humanity by Hans Erni in 2000 A.D.

.... on a naturally green planet Earth

Humankind has to find its way back to nature without squandering finite resources polluting the environment and endangering the health

.... in pure air and with clean water

Pollution of air, water and food is the main reason for severe health problems. It must and can be drastically reduced by benign clean sustainable energies.

.... clean sustainable energy for all

All our associated organizations are working on the implementation of decentralized clean environment-friendly energy systems for everybody

.... peacefully in an armless society

All the wasteful war budgets of over one Trillion \$ p.a. must be deviated into peace-building activities and clean sustainable energy to protect humankind

CMDC

The World Circle of the Consensus (Cercle Mondial Du Consensus) initiated 1984 the Global Code of Ethics during the Marcos corruption in the Philippines. In 1992 CMDC proclaimed the **Global Energy Charter for Sustainable Development** by its World Sustainable Energy Coalition **WSEC** at the first Rio Summit in 1992 www.cmdc.net

ISEO is the UN-ECOSOC accredited NGO initiated 2002 at the Swiss National Council by members of six political parties to promote and implement sustainable energy world-wide, based on the earlier initiative by the **CMDC** World Sustainable Energy Coalition **WSEC**, proclaiming the Global Sustainable Energy Charter www.uniseo.org

The **International Ecoenergy Academy IEA** founded in Baku as forerunner of ecological energy policies and strategies is associated with **ISEO** in Geneva to expand its fruitful work world-wide to bring the environment and energy into balance. The extended Blueprint for the UN Sustainable Energy Decade will be jointly issued. www.iea.org

ISO together with **IEC** in the electrical field and **ITU** for the telecommunication domain are indispensable bodies for technical energy standards and systems analyses, certification and management www.iso.org & www.iec.ch & www.itu.int

Globo stands for the standardized future global currency initiated by **CMDC** in 2011, announced at the Rio+20 Summit, to be proclaimed in 2014 at the Global Currency Summit with every nation partaking. See CMDC Newsletters on www.cmdc.net

The International Clean Energy Consortium **ICEC** was founded 1991 ahead of the Rio Summit in 1992 as a vehicle for the implementation of clean energy systems, based on the Global Energy Charter for Sustainable Development. It cooperates with universities, manufacturers and investors. www.icec.ch

..... **all in harmony with a motivated international team**

Divisions:

METHASYN the universal future clean, sustainable fuel & feedstock www.methasyn.com

STARWIND the 4th generation gearless p.m. wind turbine technology www.starwind.info

GEOCOGEN the 4th generation geothermal co-generation technology www.geocogen.com

HYSOLAR the 4th generation solar hybrid heat & PV technology www.icec.ch

HELM the innovative contracting formula for clean energy projects www.icec.ch

MEDSHILD will protect the shores, settlements and deltas of the Mediterranean and Black seas from the rising ocean level by controlling the Med Sea level and producing lots of clean, sustainable energy*, desalinated water, **METHASYN** fuel and feedstock www.medshild.com

REDSHILD is the counter part of MEDSHILD to protect the shores of the Red Sea and the Suez Canal from the rising ocean sea level, also producing lots of clean, renewable energy: **HYDROPOWER, STARWIND & HYSOLAR** as well as **GEOCOGEN** on both sides of the dam*

STOP the most insane, finite Energy Technology !!!!

Too many signs that the Pacific Coasts are being deadly threatened by Nuclear Radiation from Fukushima

Every single day, 300 tons of radioactive water from Fukushima enters the Pacific Ocean. That means that the total amount of radioactive material released is constantly increasing, and it is steadily building up in our food chain. Ultimately, all of this nuclear radiation will outlive all of us. It will take decades to clean up the Fukushima disaster, and meanwhile countless innocent people will develop **cancer** and other health problems as a result of exposure to high levels of nuclear radiation. Such nuclear disasters, as experienced also in Chernobyl and with all Strontium and other lethal leakages will wipe out all life on Earth, **if the United Nations Organisation is not enforcing international laws to stop all nuclear power plant projects and to decommission all existing ones!**

☢ **There is too much evidence that the life of the whole world is being endangered by nuclear radiation!** ☢

☢ Polar bears, seals and walrus along the Alaska coastline are suffering from fur loss and open sores ☢
Wildlife experts are studying whether fur loss and open sores detected in nine polar bears in recent weeks is widespread and related to similar incidents among seals and walrus. The bears were among 33 spotted near Barrow, Alaska, during routine survey work along the Arctic coastline. Tests showed they had "alopecia, or loss of fur and other skin lesions" the U.S. Geological Survey said in a statement.

☢ There is an epidemic of sea lion deaths along the California coastline ☢
At island rookeries off the Southern California coast, 45 percent of the pups born in June have died, said Sharon Melin, a wildlife biologist for the National Marine Fisheries Service based in Seattle. Normally, less than one-third of the pups would die. It's gotten so bad in the past two weeks that the National Oceanic and Atmospheric Administration declared an "unusual mortality event." ☢

☢ Along the Pacific coast of Canada and the Alaska coastline, the population of sockeye salmon is at a historic low. Many are blaming Fukushima ☢

☢ Something is causing fish all along the West coast of Canada to bleed from their gills, bellies and eyeballs ☢
